

FERTI-TECH
Australia Pty Ltd

PRODUCT SHEET
Ferti-Magnesium
"Chelate"

GENERAL INFORMATION

Ferti-Magnesium is highly concentrated and chelated for optimal assimilation. For best results it is best to treat deficiency before visual symptoms appear. By applying Ferti-Magnesium to the leaves or soil, rapid absorption of magnesium is achieved.

IMPORTANCE

- Plays a fundamental role in photosynthesis.
- Essential to ensure optimal plant metabolic functions and enzyme processes.
- Assists in the uptake and mobilisation of phosphorus

TYPICAL ANALYSIS

Elemental Analysis	Gm/ltr	w/v %
Magnesium (Mg)	45	4.5
Sulphur (S)	59	5.9
With added Potassium Fulvate		

APPLICATION

CROP TYPE	APPLICATION RATES	
	Rate/Ha	Water Ratio
Foliar Treatment		
Broadacre crops	2-3L	50-100L
Horticulture and Viticulture	1-3L	50-100L
Fertigation		
Orchards, Vineyards, Horticulture	2-5L	VARIOUS

DIRECTIONS FOR USE

AGITATE DRUM WELL BEFORE USE

RISK: DO NOT Mix with other plant foods, pesticides, etc without prior testing for compatibility

AVAILABILITY: available in 20 Lt Drums, 200 Lt Drums and 1000 Lt Shuttle
