

# Ferti-P-KMax<sup>tm</sup>

General Purpose PK Growth & Fertility Foliar

## Ferti-P-KMax<sup>tm</sup> 13-30 + Trace

Ferti-P-KMax<sup>tm</sup> can be used to replace solid PK applications in many agricultural settings. Soil chemistry lockups and antagonists are bypassed, chelated high analysis PK nutrition is delivered directly to plants for a bigger growth, energy and fertility response. Ferti-P-KMax<sup>tm</sup> can be used as the base fertiliser program on which other key elements are applied (subject to tissue test) or in circumstances where a solid fertiliser application has failed to provide sufficient growth and vigour to the crop. Poor germination, slow root development, stunted leaf growth, reduced flowering and other adverse cropping events can be recovered with timely application of Ferti-P-KMax<sup>tm</sup>.

### Recommended Dosage Rates

#### Orchards & Tree Crops

2-4 litres per Ha per foliar or 5 litres in line drip feed fertigation (3-4 week rotations). Do not apply during flowering.

#### Grapes, Vines, Canes, Berries

1-2 litres per Ha per foliar or 5 litres in line drip feed fertigation (1-2 week rotations) Do not apply during flowering.

#### Potatoes, Onions and General Horticulture

4 litres per Ha per foliar (2-4 week rotations). Do not use in Pivot irrigation/fertigation, Boom and Direct Spray application only.

#### Pasture & Dairy

2-4 litres per ha per foliar as required.

#### BroadAcre Cereals and Oilseeds

1-2 litres per Ha per foliar (T2-Z.14/Z.30)

#### Not Recommended for Use in Liquid Inject.

Refer to Ferti-Tech SOIL Phos-Trak with UAN/Liquid Urea Addition. (FTA Soil Only Injection Liquids are specifically designed for purpose)

- Do not Mix Neat, Jar Test if using Other Additions.
- Add to Cart Water Separate
- Suitable for use with other Ferti Tech Supplemental Nutrition.

#### Quick, Effective PK Macro-Element Support

Ferti-P-KMax<sup>tm</sup> is designed as a high analysis Phosphorus and Potassium fertiliser product; with essential trace elements, and is compatible with Liquid Urea and UAN Nitrogen applications.

Phosphorus is vital for early root development, vigorous shoots and ensures energetic growth is maintained. All plants need plenty of energy reserves to grow, reproduce and defend against attack.

Potassium is vital for enzyme synthesis, protein synthesis, photosynthesis, sugar movement, growth, water use efficiency and a host of yield producing functions.

Ferti-P-KMax <sup>tm</sup>	% w/v
Phosphorus	13.7%
Potassium	30.2%
Manganese	0.08%
Copper	0.026%
Zinc	0.026%
Iron	0.039%
Molybdenum	0.004%

Also contains Chelated EDTA Trace Element Compounds and Phloem Effective Foliar Additives
