

Ferti-Fruit&Vine™

Wide Spectrum Fertility Support for Vines & Bud Growth

Ferti-Fruit & Vine™ Berry, Flower & Table Grape Foliar

Formulated with a non-ionic surfactant for maximum wetting and penetrative effectiveness, Ferti-Fruit & Vine™ contains a vast array of instantly usable nutrition for all grape, berry and seedling growth applications.

Seagrass extracts, rich kelp concentrates (including alginates, amino acids, trace elements and plant hormones) fulvic and humic acids, brix building stimulants and more. Ferti-Fruit & Vine™ is the complete 'bud-building' package for naturally balanced growth, vitality and yield. Specifically designed to promote amino acid synthesis for 'bunch' growth supported by highly available Nitrogen, Phosphorus, Potassium, and Sulphur - with many Trace Minerals and Plant Stimulants present.

Excellent for increased size, length and volume with multiple flowering buds in berry vines, fruit trees, grape vines and cut flower production.

Ferti-Fruit & Vine™ % w/v

Nitrogen	5.0
Phosphorus	8.0
Potassium	4.0
Carbohydrates	2.0
Potassium Fulvate	2.5
Magnesium	1.5
Sulphur	1.4
Manganese	1.35
Zinc	1.15
Boron	0.22
Copper	0.16
Iron	0.15
Molybdenum	0.013
Cobalt	0.007

Amino Acids – Threonine and Lysine with Trace Auxins, Cytokinins and Gibberilins

Application

- **Vines - Table Grapes**
5-10 Litres Per Hectare after stem extensions and prior to Bud Initiation.
3-6 Litres per Hectare at bunch form or early Fruit Set.
- **Berry Vines – Blueberry, Raspberry**
4-8 Litres Per Hectare after stem extensions and prior to Bud Initiation.
2-4 Litres per Hectare at bunch form or early Fruit Set.
- **Tree Crops – Loganberry, Mulberry**
Depending on age and size of Trees,
4-8 Litres per Hectare prior at Bud initiation and prior to Fruit Set
- **Cut Flowers – Multiple Stems**
Depending on preferred length and flower count – consult with FTA.

Ferti-Fruit & Vine™ has a clever Amino Acid cocktail as well as Fulvic/Humic Acid content to support longer bud development. Designed with complexed nutrition to quickly build several % points on plant sugar levels for improved health and better quality produce. Also providing a better resistance to pests and disease.

Ferti-Fruit & Vine has Seagrass and Kelp Concentrates

- Brix building stimulants also provide increased hormonal signalling to plants as well as the usual increased protection from frost.
- Amino Acids and Potassium for improved flowering and fruit set. Natural Plant Growth Hormones for increased productivity and bud mass.
