

'GROW * ZONE'

General Product Use

Chelates and holds nutrients (MAP/ DAP/Urea/ SOA/ SOP) in a loosely charged Carbon bond for plants to easily access nutrition. Maximizes fertilizer availability and efficiency.

Most useful in cases where poor soil structure, leaching, low nutrient exchange and 'lock-up' or 'lock-out' soil chemistry problems can occur.

Use to Buffer Extreme pH, Salt-Affected and Sodic soil profiles. Repairs Soil Fertility problems in season as well as creating a potent soil microbiome for future success.
