

2PakTrichoderma

Biological Inoculum against Fusarium type Root Diseases

2PakTrichodermatm

The bacterium Bacillus amyloliquefaciens and the Trichoderma fungi species Harzianum attack, parasitize and consume other fungi that try to invade "their space". They are active colonizers and defenders of their hosts root system and will reproduce best when there is an abundance of healthy roots promoting an active microbial zone around them. Once established they have evolved numerous mechanisms to attack other fungi that are trying to take "their territory" as well as enhancing the host plants normal root growth. The greater success of Biological Inoculum against already established soil borne fungal pathogens often depends upon its own quick establishment, colonizing

2PakTrichodermatm Inoculum quickly colonises the emerging root system and actively defends its "territory" against Rhizoctonia infestation a vigorous root growth and being aided by overall plant health.

Recommended Coating Rate

- Large Seeds (Lentils/Peas/Vetch)
 0.5LT / tonne
- Medium Seeds (Cereals) 1LT / tonne
- Small Seeds (Grass/Canola) 5LT / tonne

Apply with Ferti-Seed Enhancer for Easy Application

- Add 2 Pak Mix to Seed Enhancer.
- Add Trichoderma with 3 litres Fulvic Acid (Buffer) with required Seed Enhancer (per tonne of seed).

Seed Enhancertm % w/v

Nitrogen	0.46
Phosphorus	9.02
Potassium	1.84
Sulphur	3.28
Magnesium	0.60
Iron	0.25
Manganese	2.94
Copper	0.50
Zinc	2.31
Boron	0.04
Molybdenum	0.06
Cobalt	0.012

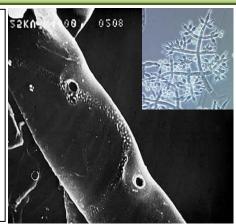

Trace Auxins, Cytokinins and Gibberilins Complexed Humic Acids

Seed Enhancertm has High Levels of Phosphorus, Potassium, Sulphur, Zinc and Manganese

- **P** for strong root formation, growth, energy, yield set and resistance to pests and disease
- K for better leaf and stomata function, growth, enzyme and protein synthesis
- S and Mn for improved chlorophyll synthesis, element uptake and optimal seed formation
- Zn for protein conversion, sugar build, hormone stimulation and optimal water holding status

Trichoderma Harzianum and Bacillus amyloliquefaciens are Proven Defenders against Root Disease Pathogens Always use 2Pak Trichoderma with Ferti-Seed Enhancer to maximise early root growth and optimal nutritional status. The most effective disease resistance programs include Genetic, Biologic, Physical and Chemical controls.
