

## Seed Enhancer AM<sup>tm</sup>

The most cost effective and “smart start” AM fertiliser seed dressing available. The 2 PAK Ferti-Seed Enhancer AM is an easy to use nutritional package that ensures fast germination and vigorous root and leaf growth for the first 4-6 weeks of life and ensures your AM Inoculum is successfully established. Do not rely on Non-Certified AM sources; do not rely on inferior AM seed dressings that cannot guarantee their AM is still active and will deliver fully viable spore counts. Use Ferti-Seed Enhancer AM to ensure maximum crop establishment as soon as possible. AM is a beneficial soil fungi that attaches micro-filaments (hyphae) to the roots of most plants. Ferti-Tech AM is a registered laboratory made, and proven, selection of AM Species that improves plant water use efficiency, nutrient absorption from the soil solution (particularly Phosphorus), plant establishment and growth and soil aggregation. Productivity benefits include better resistance to dry periods, improved micro-nutrient status and plant health.

### Directions

USE WITHIN 48 HRS OF OPENING THE VACUUM SEALED AM PACK

- Mix 300gms AM with 20 Litres Ferti-Seed Enhancer AM
- Apply 5 litres per tonne of seed (cereals) or 10-20 litres per tonne small seeds. Pasture Grass, Lucerne, Vegetable etc.
- Apply to Seed For Best Result

### Dilute for Easy Application

Mix 1:1 up to 5 litres Water

Suitable for use with Ferti-Tech 2Pak Trichoderma Seed Inoculum, for use against Rhizoctonia.

DO NOT USE ON FUNGICIDE TREATED SEED
