

# Ferti-Tech 'Super 20'

High Analysis Soluble Carbon Chelating Fertilizer

**N P K S**

**20 - 14 - 0 - 1**

**20 - 12 - 0 - 1**

## Ferti-Tech 'Super' % w/v

### Nitrogen

pH 6.5 or Less 20.27  
pH 6.5 or More 20.15

### Phosphorus

pH 6.5 or Less 14.08  
pH 6.5 or More 12.16

Soluble Carbon Humate 10.0  
Potassium 0.03  
Silicon Complex 6.0  
Calcium 0.45  
Sulphur 0.99+  
Magnesium 0.04  
Iron 0.14  
Zinc 0.006

Trace Copper, Boron, Molybdenum,  
Cobalt with Bacterial and Fungi  
Inoculum Stabilised in Carbon  
Complexed Humic Acids.

10+% Carbon/Silicon Compounds

**Bacillus Polymyxa, Bacillus Subtilis  
Azotobacter, Trichoderma Harzianum**

Proven Microbial Agents for Nutrient  
Release and Fertile Soil Systems

## Ferti-Tech 'Super' The Soluble Carbon Chelator with Acid or Alkaline Soil Options

Combining the best of both worlds – A High Analysis Nitrogen/  
Phosphorus Fertiliser with Water Soluble Anionic Carbon  
Protection. Prevent lock ups, buffer against soil chemical  
antagonisms and grow crops with the reassurance of a strong  
Nitrogen and Phosphorus availability. Ferti-Tech 'Super' gives a lot  
more back to your soil for future productivity as well. Stabilised  
slow release Traces and proven Biological Inoculums for ongoing  
improvements in soil health and fertility.

- Buffers against Calcium ++ Lock Up or Metallic Lock Outs
- Strongly Reduces Sodium, Chloride and Sodic Effects
- Improves Cation Exchange Capacity and Raises the In  
season Carbon Profile in Low Organic Matter Soils
- Leaves an Active Beneficial Soil Biology for future Fertility  
and Productivity
- Offers ACID/ALKALINE Soil Options for Better Solubilisation

## Ferti-Tech 'Super' is a Carbon Chelator of Nitrogen and Phosphorus and stimulates a Very Cost Effective Ongoing Beneficial Biology.

- Important Buffer for Ion exchange Nitrogen transfer in the  
Rhizosphere. Prevents Leaching and prevents NO<sub>2</sub> creation  
but is a catalyst for O<sub>2</sub> and CO<sub>2</sub> production
- Provides Microbial Food, Harbour and Stimulation
- Stimulates Carbohydrate Secretions from the Root System,  
Aids Humus Formation and continues Microbe Performance
