

FERTI-TECH

VAM

General Product Use

VAM is a beneficial soil fungi that attaches micro-filaments (hyphae) to the roots of most plants. Ferti-Tech VAM is a proven selection of VAM Species that improves plant water use efficiency, nutrient absorption from the soil solution (particularly Phosphorus), plant establishment and growth and soil aggregation. Productivity benefits include better resistance to dry periods, improved micro-nutrient status and plant health

Vesicular Arbuscular Mycorrhiza Fungi DRY POWDER LABORATORY PREPARED INOCULUM

1 KG

200,000 SPORE COUNT PER KILO
