

Ferti-Fulvic 10

FERTI-TECH

General Product Use:

Fulvic Acid is a uniquely small organic acid molecule with an extremely high cation exchange capacity (1400+) making it one of the most effective chelating agents for binding with useful (and toxic) elements.

It also acts to solubilise minerals for plant use, oxygenate, penetrate, and aid in transpiration, immobilize harmful contaminants in soil (promoting a healthier farm) and detoxify chemically affected soils

Benefits:

- Increases Growth Rates of Plants
- Microbial Stimulant and Soil Oxygenator
- Increases Drought Resistance and Yields
- Stimulates Plant Auxin Production
- Acts as an Anti-Oxidant

First Aid

Harmful if Swallowed.

Wash Eyes. Seek Medical Attention.

If swallowed do not induce vomiting. Give plenty of water, seek medical attention.

Typical Analysis % w/v

10% Fulvic Acid w/v
BioLignin Extraction
Also Contains
Nitrogen
Calcium
LignoSulphonates

pH 5.0

1000LT

Directions:

- AGITATE WELL BEFORE USE

Application Rates:

High Strength Liquid Fulvic Acid Formulation for use (at 1%) in Foliar Cart Water or Undiluted Direct Mix with:

- Fertiliser
- Chemicals
- Seed coatings
- Seed dressing
- Pickles

Suitable for Intensive Crops, Hydroponics, Horticulture and Targeted High Performance Chelating.

Handling & Safety

Minimise skin contact. Avoid spraying onto paths & buildings. Wear Gloves & Eye Protection at all times.

- DO NOT MIX with other products, plant foods, pesticides etc.
- Testing for proper compatibility must be conducted by FTA first.

Condition of Sale – Intended Use

This Product is carefully manufactured as fit for its intended purpose. Product Warranty is valid for up to 6 months after Date of Delivery and Product Liability is always subject to the proper use and handling instructions detailed on this label.
