SETTING UP A YIELD FINISH!
Visit www.fertitech.com

Are you checking your Crops Yield Prospects ....

It is one thing to grow some big root mass but its another thing to know the Nutrition Status so as to have knowledge about yield bearing limitations of various elements in the big picture, versus season conditions.

DON'T GUESS! GET LEAF TEST DONE!!

Is Nitrogen stand alone the best and cheapest way forward **NO**

Complexing Nitrogen and keeping your dollar inputs neutral is a real option with Yield Benefits. **YES**

Good Science shows us a means of Capitalising on Rain at the Crops Various Growth Phases, or does the insight simply tell you to do Nothing ….. Call Us!

HOW CAN YOU TOP AND TAIL PLANTS TO IMPROVE FERTLISER UPTAKE AND GAIN QUALITY YIELD

BIONiK

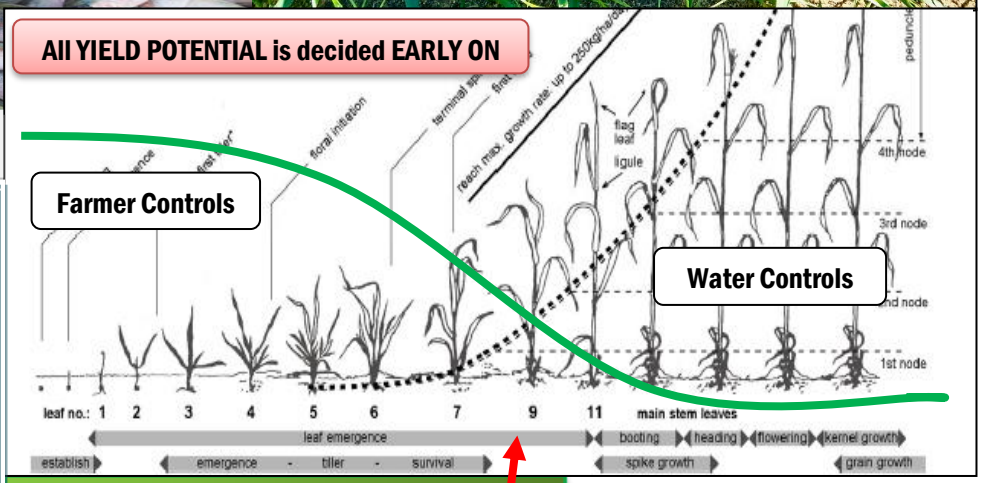
BIONiK BUFFERS UAN/SYNTHETIC-N QUICKLY!

BIONiK CARBONISED OILS & NATURAL FATS STOPS LEACHING & VOLATILITY (LAB-TESTED 105C). SUPERIOR LUBRICATION OF EQUIPMENT PREVENTS CHEMICAL WEAR & ABRASIVE DAMAGE.

Use BIONiKtm to make UAN/Synthetic-N Very Soil Friendly and Totally Plant Compatible. Significantly Improve the Function and Efficiency of N in Cases of -

- Low SOC (Soil Organic Carbon)
- Low CEC (Cation Exchange Capacity)
- Low Microbial Activity / Non-Wetting Soil Profile
- Sandy and Sandy/Loam Soil Profile
- Extreme Soil pH (Acid/Alkaline)
- Extreme Soil Exchangeable Hydrogen
- Soil - Salt Affected (3%+)
- Water - Salt Affected (Irr/Fertigation)
- Heavy Metals Affected
- Compacted or Anaerobic Soils

All YIELD POTENTIAL is decided EARLY ON



CSA GROWING SYSTEM HAS ANSWERS

Everyone has an opinion on how to Grow Crops up to "Now" but how do you use Nutrition to Minimise Yield Loss if the follow up rains don't arrive?? If it does rain, has the same system set your plants up to milk the rain, to fill out those seed heads?
