FERTI-TECH

OVERCOMING DRY SPELLS!

Visit www.fertitech.com

Soluble Carbon based programs with standard NPK's & Nutrition strategically/directly applied with timing overcomes seasonal climatic issues!

Harvest time is well underway in many areas of Australia. Seasonal conditions continue to play a big role and that uncertainty & unreliability of rain events is an ongoing issue for farmers. The biggest concern is that it has now become the norm, Ferti-Tech has been dealing with these realities for the past 20+ yrs and by listening to the farmers concerns & issues in the field we have developed systems to support production no matter the season. These images show two vastly different scenarios.

Dryland pasture, despite some long dry spells, after receiving rainfall was planted achieving an even germination of a mainly Rye/Clover + Barley mix supported by a base granule followed up by complexed UAN with Nutrition Boosters. The concerns of red mite with resistance in the area was overcome by additional CSA Nutritional Foliars raising brix in plants & continuing to stimulate root activity. The 1st cut mid September on 85ha was 630 silage rolls @ 700kg average 'Wet' 45% moisture. Ground was re-fertilised with a Potassium emphasis and received a direct liquid drench into the cut stubble of **Pasture Master** & Nutrition based liquids. The 2nd cut approx 24th October 70ha for haylage, it was 518 x 1Tonne Haylage Rolls this time & approx 35% moisture. The Ground Moisture was held in place with Carbon based Nutrition supporting soil moisture and ongoing biological activity.

StockLiks Special

THE SUPER SMART DRY FEED STOCKLIK THAT

- MAINTAINS EXCELLENT STOCK CONDITION
- TURNS FEED CONVERSION AND WEIGHT ON!
- SUPPORTS THE ANIMALS RUMEN TO IMPROVE OVERALL HEALTH AS WELL AS SPERM COUNT, PREGNANCY RATES, ESTABLISH NEW BORN'S RUMEN HEALTH FOR LIFE AHEAD

22Kgs DRY SOLID BLOCK
No Water & No Useless Grit in Our Blocks!

FROM \$38 WRAPPED & BOXED* = \$1.72 PER KILO (WA/TAS)

FROM \$34 WRAPPED & BOXED* = \$1.54 PER KILO (SA/VIC/NSW)

RANGE INCLUDES:

Stubbler, All Purpose, Supergrade & more

STUBBLER TYPICAL ANALYSIS

IODISED SEA SALT, BLACK STRAP MOLASSES, REACTED CARBON, SULPHUR, CAL-CARBONATE, CAL-SULPHATE, DI-CAL PHOSPHATE, 440 GMS LOW BIURET UREA & TRACE ELEMENTS (MG/KG) MANGANESE-670 COPPER 357 ZINC-323 IRON-245 IODINE-100 COBALT-45

SEMI-LOAD OF STOCKLIKS SPECIAL OFFER*

- \$40 OFF 1X LAYER 20 BLOCKS
- \$80 OFF 2X LAYER 40 BLOCKS
- \$160 OFF PALLET 60 BLOCKS

OFFER ENDS ON DEC 18

VIC (WA) 0437 021 712
MAT (VIC/NSW/TAS/SA) 0439 973 759
OFFICE 08 9725 6877

*Plus GST/ In-State Delivery -
Ex Depot WA - Perth/Bunbury SA - Ex Adelaide
VIC - Ex Melbourne TAS - Ex Launceston

A crop normally in a high reliable rainfall zone get's a false start to the season. A long dry spell follows up some equipment issues and this last crop wasn't seeded until late July. A base granule fertiliser was used with the budget split to include **Seed Enhancer** with a **Liquid Soil Drench** nutritional fertiliser complexing the UAN. Despite July/Aug germination the crop is as thick as the hair on a dog's back. It was given a foliar designed to stimulate root development to overcome winter cold & short days. No rain in October crops are subject to haying off however this crop is still a lush green and would only continue to fill out even more if it rained. No rain arrived, so no nitrogen applied in spring, no fungicide or herbicide.
