

FERTI-TECH

# FURROW\*MASTER

**FOR USE WITH FRICTION-INDUCTION LIQUID INJECT  
32 MESH OR LESS PRESSURE FILTERS (SELF CLEANING)  
1.5MM + DIAMETER FLOW LINES FROM THE MANIFOLD TO  
THE TYNE OR DISC + EXTRA TANK AGITATION**

## **FurrowMaster™ Soil Fertility Regenerator**

Chelates and holds nutrients (MAP/ DAP/Urea/ SOA/ SOP) in a loosely charged Carbon bond for plants to easily access nutrition. Maximizes fertilizer availability and efficiency. Most useful in cases where poor soil structure, leaching, low nutrient exchange and 'lock-up' or 'lock-out' soil chemistry problems can occur. Use to Buffer Extreme pH, Salt-Affected and Sodic soil profiles. Repairs Soil Fertility problems in season as well as creating a potent soil microbiome for future success.

1. Adjusts Rhizosphere pH to make synthetic NPK uptake more efficient.
2. Combats Sub soil Hardpans and non wetting soils with biology Root exploration.
3. Generates Nitrogen production and synthesis without carbon burn.
4. Promotes locked and trace element oxidation for greater uptake.
5. Critical feed source for VAM and other beneficial fungi growth.

Years of results in the field have farmers reporting, vastly improved root mass getting down after sub soil moisture. Trials have shown root uptake increases of NPKS, Calcium and Traces in season, Furrow pH self-regulates, buffers salts, toxins. Plant sync Nutrition provides protection from frost, pests and Disease. Stores more water and buffers wind damage.

## **Typical Analysis % w/v**

**GROWZONE 80**

**PASTURE MASTER 20**

**NPKS Ca & Trace Elements**

**Germination Booster**

## **SOIL FERTILITY REGENERATOR**

**Complexed Reactive Liquid CARBON,**  
Naturally Potent Chelators & BioStimulants;  
**A buffer of Salts/Toxins/Synthetics/Acid**  
Organic NPKS, Fish Emulsion Oils and Cartilage  
**Superior Beneficial Microbial Stimulant**  
Stem/Root and Tissue Growth.  
Promotes robust nutritional bulk mass and  
powerfull Enzyme Action.  
Full Spectrum Organic, Fulvic & Humic Acids

**Immediate control of Moisture and Nutrient retention in the Furrow to  
Maximise Germination vigour whatever the season and to Increase Granule  
fertiliser efficiency.**

### **Use and Recommended Dosage Rates:**

- Apply 10 to 30 Litres per Hectare, Pending your growing program and your soil type/region rainfall.
