

DIY Liquid Inject Delivery System

At Ferti-Tech, our team has crafted a straightforward, yet durable liquid inject system with the farmer in mind. Our primary focus was on simplicity and affordability. We believe the price is within reach for most farmers and designed it to be assembled easily, whether by themselves or with our assistance. Each component of the system has been carefully chosen to ensure availability from reputable parts suppliers. It is designed for effortless assembly and compatibility with various machinery types. The selected parts are sturdy and designed for easy interchangeability if needed. Whether you prefer a DIY approach, purchasing parts from us as a kit for assembly, or having us assemble it for you, we offer flexible options to suit your needs.

“With a fully installed cost of under \$10K (excluding tanks), it represents the most cost-effective solution on the market, ensuring you get top-quality results without breaking the bank.”
