Ferti-UltraCal

UltraCal is designed to improve Cellular Health of all fruits, vegetables, tubers, oilseeds, grains etc without causing the usual growth stress, poor Calcium uptake and disease issues associated with the over-use of Calcium Nitrate. UltraCal provides a better keeping quality and nutrient balance. A Highly Penetrating and functional form of 'pure' Calcium used to raise the Sap and Cell Calcium content of plants and their produce. Calcium is a Transport System for all nutrients, without it, Distorted Growth of young leaves and fruit will occur.

Ferti-UltraCal B

Maximises Beneficial Calcium Quality & Health with added Boron Support. Boron is responsible for Seed and Cell Formation, Sugar Translocation, Protein Formation, Amino Acid Synthesis, Nodule Formation, helps flowers "stick" for Optimum Pollination and Increases Potassium and Phosphorus Uptake. Deficient Boron often Induces Calcium Deficiency.
